

National Assistant (m/f/d) Chief Technical Advisor (ACTA) - National Park Management

Short project description

The overall objective of Forest Programme III is to contribute to the implementation of strategies for forest conservation and rehabilitation in order to reduce climate relevant emissions and improve livelihoods of the rural poor (= overall objective of Indonesian-German Forest Programmes).

The specific objective of this Programme (programme goal) is the implementation of a collaborative integrated management of the Lore Lindu landscape and therewith supporting Indonesia in strategy development and implementation of measures regarding conservation of biodiversity and watersheds in the framework of the national REDD+ Strategy in Central Sulawesi.

Main indicators are:

Indicator 1 on Biodiversity - Key-species (Maleo, Anoa, Babirusa)

Indicator 2 on Forest cover/ carbon stocks

Indicator 3 on cooperation between communities and BBTNLL
